

Securing incentives and 0% interest loan for Pomona's Palomares Park Community Center

SoCalREN Public Agency Programs | socalren.org

SoCalREN Public Agency Programs worked with the City of Pomona to identify, fund, and install energy efficiency upgrades for their Palomares Park Community Center.

These energy upgrades include LED lighting, HVAC modernization, and a new building management system to help the city save money, enhance facility comfort, and have better control over power-consuming equipment.

The resulting savings and positive impacts were made possible by leveraging SoCalREN's no-cost project management services, including technical, financing, incentive, and construction assistance throughout the project's timeline.

\$212,000
lifetime cost savings

900,000+
kWh
lifetime savings

Equipment Installed

- Interior and exterior LED lighting
- Package HVAC unit replacement
- Building energy management system

Sources of Funding

SoCalREN helped Pomona apply for and secure multiple sources of funding and financing!

On-Bill Financing	\$50,033
SCE Incentives	\$4,710
SoCalREN Revolving Savings Fund	\$244,176
Community Development Block Grant	\$130,000

100% of project costs funded through incentives and financing

Pomona has had the pleasure of working with SoCalREN for 10+ years. The team working on the Palomares Park project have been wonderful, always professional and knowledgeable. They stay on top of all the requirements needed to complete the project in addition to offering support to review documents throughout construction. I hope to continue our partnership on future projects.

Julie Carver, Environmental Compliance Supervisor for the City of Pomona

What's Next for the Agency

The City of Pomona is leading its community toward climate resilience. Without spending a dime of city funds, the agency is working with LA County's Public Power-Up Program and SCE's Charge Ready Program to install 19 electric vehicle charging ports at the Palomares Park Community Center. The project is expected to be completed by the end of 2024!
