

# Discover Ways To Save With SoCalREN

With a wide variety of services, the Southern California Regional Energy Network (SoCalREN) helps promote energy efficiency and sustainability throughout Southern California.

## Public Agency Programs

SoCalREN takes a comprehensive approach to helping agencies complete energy efficiency projects. From designing performance specifications to project completion, our team works alongside agency staff offering a suite of services to help identify energy-saving measures—at no cost.

Qualifying agencies include cities, counties, school districts, water districts, sanitation districts, and other public agencies throughout Southern California served by either Southern California Edison (SCE) or Southern California Gas Company (SoCalGas). Information and resources: [socalren.org/agencies](https://socalren.org/agencies) • [info@socalren.org](mailto:info@socalren.org)

## Project Management

Our team guides public agencies, from start to finish, through energy efficiency projects. We offer energy consulting and unbiased third-party project review.

## Technical Support

We provide the technical expertise needed to successfully complete energy efficiency projects, including audit and engineering calculations, portfolio-wide benchmarking, retrocommissioning support, and more.

## Financing and Funding Analysis and Proposal Support

To help your public agency make informed decisions, we offer project financial analysis and funding option analysis for your project. Enrolled agencies also have access to our exclusive Revolving Savings Fund and SoCalREN cash incentives.

## Procurement and Construction Support

To ensure your project goes smoothly through completion, SoCalREN will offer support in all phases of construction, including contract language review, procurement option analysis, review of third-party proposals, and more.

## Network Services

Our network services focus on broadening your energy efficiency knowledge and rapport with other energy-saving agencies in the network. We support agency recognition (e.g., case studies, webinars, council presentations), outreach and education, peer-to-peer networking, and stakeholder engagement.

## Residential Program

SoCalREN provides information, resources, and programs to help residents of Southern California save energy and money. Information and resources: [socalren.org/resources](https://socalren.org/resources)

## Multifamily Program

SoCalREN offers financial incentives and technical assistance to help property owners make upgrades that save energy, plus provide a healthier, more comfortable living environment for tenants. Eligible buildings must be served by Southern California Edison and SoCalGas. The Multifamily Program offers two ways to participate:

- **Whole Building** upgrades must include a minimum of three eligible energy efficiency measures and achieve a minimum of 10,000 kWh **or** 1,000 therm energy savings.
- **Comprehensive Common Area** upgrades minimize interaction with tenants by focusing on improvements in common areas only. These projects must achieve a minimum of 10,000 kWh **or** 1,000 therm energy savings.

Information and resources: [socalren.org/multifamily](https://socalren.org/multifamily) • (877) 785-2237 • [multifamily@socalren.org](mailto:multifamily@socalren.org)

## Kits for Kids Program

SoCalREN's Kits for Kids Program introduces third- and fourth-grade students from participating schools to energy efficiency. Students receive energy-efficient items at no cost, which can help their families save energy and money while improving their comfort and safety at home. Each enrolled classroom is eligible to receive a \$1,000 incentive if 65% of students install the energy-efficient items and provide proof of installation. Information and resources: [socalren.org/kitsforkids](https://socalren.org/kitsforkids)

## Workforce Education and Training Program

SoCalREN's Workforce Education and Training Program provides training, tools, and opportunities for diverse participants in disadvantaged communities to pursue careers and contract opportunities in energy efficiency.

Information and resources: [socalren.org/WET](https://socalren.org/WET)

## E-Contractor Academy

This seven-week program prepares small and diverse contractors to compete for and perform energy efficiency retrofit projects for the County of Los Angeles and throughout Southern California. The E-Contractor Academy provides contractors access to bonding and capital resources and an introduction to sustainability, public contracting requirements, and how to bid on energy efficiency projects.

The Architecture, Construction, and Engineering Students (ACES) Pathway Program provides minority students from disadvantaged communities the opportunity to co-enroll in high school and community college science, technology, engineering, art, and math (STEAM) courses and participate in paid internships. These courses and internships help prepare students for future careers in STEAM fields, including energy efficiency. ACES is available at participating schools.

Green Path Careers is a program designed to assist individuals and opportunity youth ages 18 and up in launching a career in the energy efficiency field. Participants are eligible to receive personal enrichment training to gain valuable skills, industry recognized certification, and paid work experience with local companies.
