

Comparative Energy Analysis Report

Prepared for
The City of Lakewood

Prepared by
The Energy Coalition

On Behalf of
The Southern California Regional Energy Network Public Agency Program

Date
11/1/2018

Table of Contents

1. Overview	1
2. Total Energy Portfolio	2
3. Water Pumping	3
4. Street & Traffic Lights	4
5. Building Summary	5
6. Outdoor & Park Lights	7
Appendix A - Methodology	8
Appendix B - Lakewood Buildings	

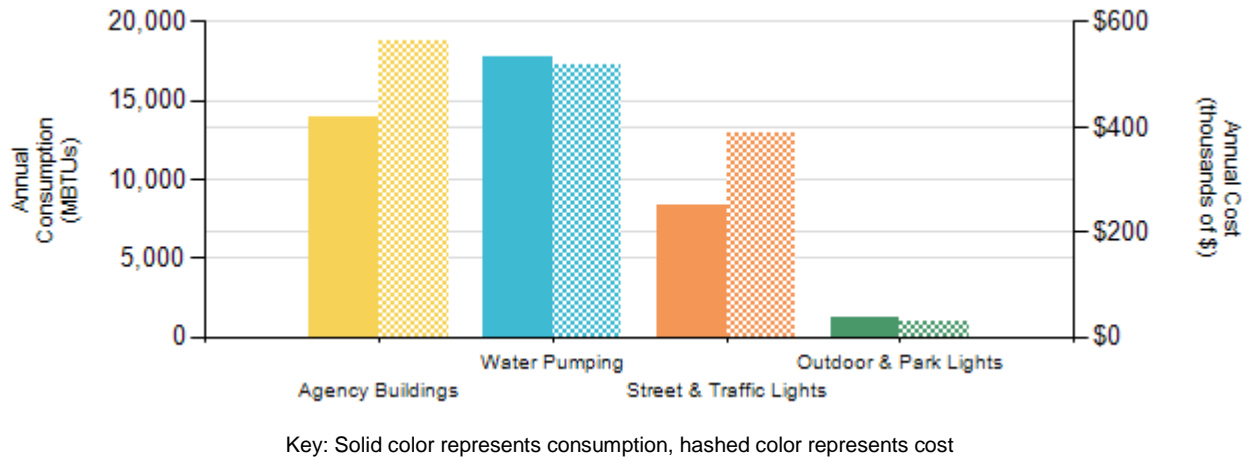

1. Overview

This report is intended to provide a framework for the City of Lakewood, referred to as “Agency” herein, to identify inefficient facilities and infrastructure and prioritize further investigation and energy efficiency retrofit work. This analysis uses only energy billing data provided by the Agency to analyze energy use across Agency assets, and to help identify opportunities for energy efficiency improvements. Many factors affect the energy use in different assets, including age, type of heating, ventilation, air conditioning (HVAC), and lighting equipment, facility occupancy and hours, plug loads, and climate. Once individual opportunities with the greatest potential for energy savings are identified, a more detailed screening of those facilities can be performed to identify the specific sources of the inefficiencies.

This report was created by The Energy Coalition on behalf of the Southern California Regional Network (www.socalren.com). Any questions about this report can be directed to your assigned Project Manager, Chris Ford at cford@energycoalition.org

2. Total Energy Portfolio

Your Total Annual Energy Cost is **\$1,452,234**

Annual Energy Costs

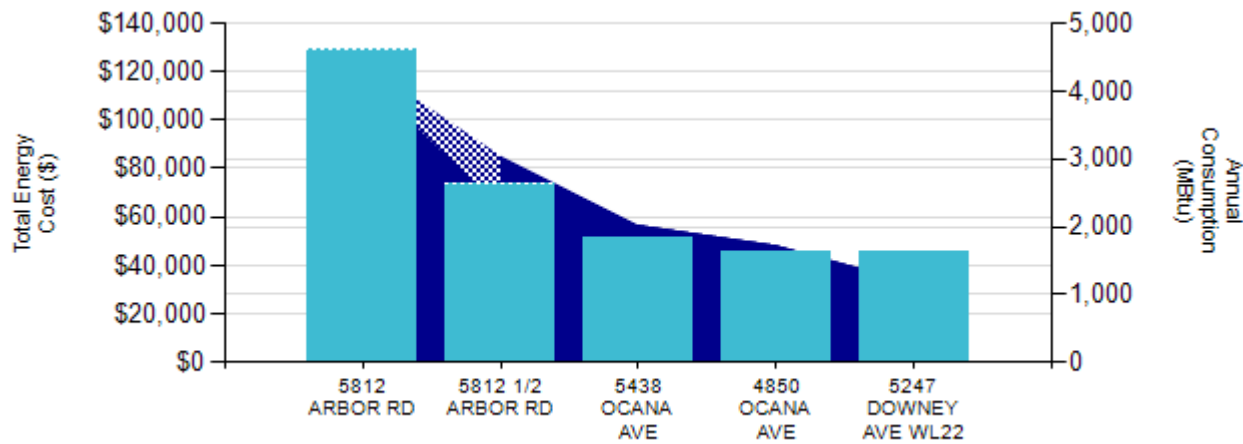

Table 1: Total Energy Portfolio (Annual)

Agency Energy Use	Electric Consumption (kWh)	Electric Cost (\$)	Gas Consumption (therms)	Gas Cost (\$)	Total Energy Consumption (MBTUs)	Total Energy Cost (\$)	GHG Emissions (lbs CO2)
Agency Buildings	2,982,859	\$551,403	37,328	\$13,497	13,904,303	\$564,899	1,542,138
Water Pumping	4,639,016	\$484,998	13,642	\$1,537	17,788,689	\$498,640	2,490,163
Street & Traffic Lights	2,450,607	\$387,952	0	\$0	8,356,571	\$387,952	1,266,964
Outdoor & Park Lights	354,610	\$28,241	0	\$0	1,209,219	\$28,241	183,333

3. Water Pumping

Your Annual Energy Cost for Water Pumping is **\$498,640** and **34.5%** of the Total Cost.

Key: Displays the top 5 consuming pumping service accounts. Columns represent Cost, Area represents Consumption.

Assumption - 65% of all pumps need to be upgraded. Those pumps will reduce consumption by 7.5% kWh post retrofit.

Calculation - projected savings are 7.5% of 65% of the total PA consumption (for ALL pump accounts)

Table 2: Water Pumping (Annual)

Site Name	Address	Electric Consumption (kWh)	Electric Cost (\$)	Electric Rate (\$/kWh)

5812 ARBOR RD	5812 ARBOR RD	1,233,450	\$128,882	\$0.10
5812 1/2 ARBOR RD	5812 1/2 ARBOR RD	664,737	\$72,874	\$0.11
5438 OCANA AVE	5438 OCANA AVE	591,023	\$51,715	\$0.09
4850 OCANA AVE	4850 OCANA AVE	503,435	\$45,762	\$0.09
5247 DOWNEY AVE WL22	5247 DOWNEY AVE WL22	340,729	\$45,351	\$0.13

4. Street & Traffic Lights

Your Annual Energy Cost for Street & Traffic Lights is **\$387,952** and **25.9%** of the Total Cost.

Assumption -agencies can save 50% on annual street & traffic light kWh consumption by converting HPS to LED.

Calculation – projected savings are 50% of the total kWh consumption of agency owned street and traffic lights (TC-1, LS-2, and LS-3). LS-1 street lights are not included in projected savings.

Table 3: Street & Traffic Lights (Annual)

Tariff	Tariff Description	Electric Consumption (kWh)	Electric Cost (\$)	Electric Rate (\$/kWh)
LS-1-ALLNITE	Street Lights (SCE Owned)	749,905	\$218,447	0.29
LS-3-B	Street Lights (Agency Owned - metered)	1,233,018	\$106,408	0.09
TC-1	Traffic Signal Lights (Agency Owned)	151,402	\$29,596	0.20
LS-2	Street Lights (Agency Owned - unmetered)	200,579	\$23,127	0.12
LS-3	Street Lights (Agency Owned - metered)	115,704	\$10,375	0.09

5. Building Summary

Your Annual Energy Cost for Buildings is **\$564,899** and **37.7%** of the Total Cost.

Key: Displays the top 10 consuming Buildings. Columns represent Cost, Area represents Consumption. Electricity is the solid shade, Natural Gas is the hashed shade.

Table 4: Building Summary (Annual)

Site Name	Address	Electric Consumption (kWh)	Electric Cost (\$)	Electric Rate (\$/kWh)	Gas Consumption (therms)	Gas Cost (\$)	Gas Rate (\$/therm)
5030 CLARK AVE	5030 CLARK AVE	811,569	\$125,316	\$0.15	6,503	\$1,004	\$0.15
Lakewood City Hall	5050 CLARK AVE	649,763	\$97,330	\$0.15	0	\$0	NaN
John S. Todd Community Center	5720 CLARK AVE	429,546	\$79,844	\$0.19	9,113	\$1,694	\$0.19
Lakewood Youth Center	S/ARBOR E/WOODRUFF	165,215	\$44,178	\$0.27	0	\$0	NaN
Burns Community Center	5510 CLARK AVE	195,607	\$35,587	\$0.18	1,391	\$253	\$0.18
5220 OLIVA AVE	5220 OLIVA AVE	185,382	\$35,816	\$0.19	0	\$0	NaN
S. Mark Taper Vista Lodge	4626 SHADEWAY RD	164,915	\$32,868	\$0.20	0	\$0	NaN
Bloomfield Park facilities	21420 PIONEER BLVD	79,479	\$27,863	\$0.35	278	\$97	\$0.35
Palms Park Community Center	12305 207TH ST	109,495	\$22,877	\$0.21	152	\$32	\$0.21
6901 DEL AMO BLVD	6901 DEL AMO BLVD	62,302	\$13,800	\$0.22	0	\$0	NaN

6. Outdoor & Park Lights

Your Annual Energy Cost for Outdoor & Park Lights is **\$28,241** and **1.9%** of the Total Cost.

Assumption -agencies can save 50% on annual outdoor & park light kWh consumption by converting HPS to LED.

Calculation – projected savings are 50% of the total kWh consumption of outdoor & park lights.

Table 5: Outdoor & Park Lights (Annual)

Name	Address	Tariff	Electric Consumption (kWh)	Electric Cost (\$)	Electric Rate (\$/kWh)
Area Lighting	101 Main St.	AL-2	352,936	\$27,680	\$0.08
Area Lighting	101 Main St.	OL-1	1,674	\$560	\$0.33

Appendix A - Methodology

1. Data Sources

- Building information, energy usage and cost data used in this analysis were derived from utility consumption billing data provided by agency staff.
 - Utility consumption billing data used in this analysis were derived from SCG gas tariffs and SCE electric tariffs
 - For more information about the utility tariffs included in this analysis refer to:
 - SCG Gas Tariffs: [For more information about Southern California Gas tariffs](https://www.socalgas.com/regulatory/tariffs/tariffs-rates.shtml); <https://www.socalgas.com/regulatory/tariffs/tariffs-rates.shtml>
 - SCE Electric Tariff: [For more information about Southern California Edison tariffs](https://www.sce.com/wps/portal/home/regulatory/tariff-books/rates-pricing-choices); <https://www.sce.com/wps/portal/home/regulatory/tariff-books/rates-pricing-choices>
 - All electricity and gas results were based on usage during period May 1, 2017 – April 30, 2018.
 - In some cases, multiple meters were associated with a single facility or asset type. For such facilities, to generate estimates of facility-wide energy use and energy intensity, energy usage and cost values were aggregated by summing energy usage and cost values for each day in the analysis period.
 - GHG emissions data used in this analysis were calculated using the conversion: 517 lb CO₂/MWh + 11.91 lbs CO₂/therm [1,2].
-

2. Total Energy Portfolio

- Total Energy Portfolio data represents an analysis of each agency facility type annual energy costs, annual energy consumption (kWh), GHG Emissions and total annual energy costs for agency facility types based on MBtus.
- The following agency assets are included in the Total Energy Portfolio:
 - Water Pumping
 - Street & Traffic Lights
 - Buildings
 - Outdoor & Parks Lights

3. Water Pumping

- Water pumping data represents an analysis of the top five highest energy consuming water and wastewater pumping SCE service accounts annual energy costs, annual energy consumption (kWh), GHG Emissions, and total annual energy costs based on MBtus.
- Water pump conversion data used in this analysis is derived on the assumption that 65% of all existing pumps need to be upgraded. Of the 65% of pumps requiring upgrades, it is assumed that the pumps will save 7.5% of their annual kWh consumption [3].

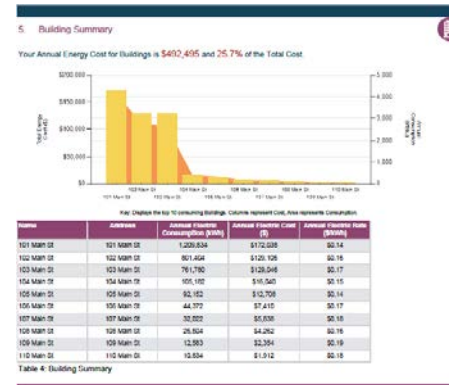

4. Street & Traffic Lights

- Street & traffic light data represents an analysis of annual energy costs, annual energy consumption (kWh), GHG Emissions per SCE street & traffic light tariff type.
- Annual cost savings reflects only agency owned street lights in the analysis; assumed cost savings conversion is based on converting HPS to LED agency owned traffic and street lights [3].
- On average, agencies can save 50% on annual kWh consumption by converting HPS to LED, which also results in cost savings [3].

5. Building Summary

- Building summary data represents an analysis of the top ten highest energy consuming agency buildings annual energy costs, annual energy consumption (kWh), GHG Emissions, and total annual energy costs based on MBtus.

6. Outdoor & Park Lights

- Outdoor & park lights data represents an analysis of annual energy costs, annual energy consumption (kWh), GHG Emissions, and total annual energy costs based on MBtus per SCE outdoor and park lighting tariff type

Certain properties did not have energy usage data for the range of the analysis period and were excluded:

Tariff Type	Meter Number
Pumping	1152432
