

The SoCalREN Public Agency Program was created in the belief that public agencies can be powerful agents of change. Energy conservation at the local level gives communities direct, tangible benefits like freeing up public resources. Take a look at what agencies enrolled in the SoCalREN Public Agency Program accomplished together and thanks again for joining us and making an impact.

Note: % of Annual Energy Savings Since Enrollment includes projects that are completed based on construction end date.

## Overall Impacts on Communities Served

Note: overall impacts determined based on energy savings and assumed benefits per kWh/therm reduced.

Below is a personalized status update for the City of Santa Clarita. Since the enrollment of the City in June 2018, the SoCalREN Public Agency Program has worked with the City of Santa Clarita to improve its energy efficiency and save money as shown below:
