

Unlock new energy efficiency project opportunities with SoCalREN's Metered Savings Program!

SoCalREN's Metered Savings Program is an innovative approach to use normalized metered energy consumption (NMEC) to measure energy efficiency savings at the meter for facilities and other assets.

- Access SoCalREN's technical services, including energy savings evaluation, project scoping, financing support, procurement, project management and other resources, even for projects that are not incentivized by utility programs.
- The Metered Savings Program is a one-stop shop for support on all of the energy efficiency measures in your project. This comprehensive approach reduces the complexity of multi-measure projects, allowing for deeper savings with speedier project completion.
- The Metered Savings Program offers ongoing support through your project completion and beyond. Our Metered Savings Program includes post-implementation training support with comprehensive maintenance plans for operational staff, building overall agency staff capacity and expertise.

How It Works

Unlock support for "stranded savings"

Projects with 10% or greater energy savings are eligible for Metered Savings Program

One-stop shop from project start to finish

A one-stop shop from project start to finish. Services include incentive applications, financing support, procurement & technical support

Persistent energy savings with ongoing support

Support after project completion includes post-implementation training, maintenance plans, and energy tracking

Your SoCalREN Project Manager will support you every step of the way!

Unlock comprehensive project support with cash incentives. Any agency completing an energy efficiency project with 10% or more potential energy savings* are eligible to receive services.

This includes projects opportunities ineligible for traditional incentive programs!

Access SoCalREN's technical services, including energy savings evaluation, project scoping, financing support, project management and other resources.

Get post-construction data insights. Track energy savings after construction has completed with recurring savings reports.

Get SoCalREN cash incentives to boost project financials. SoCalREN offers incentives based on greenhouse gas emissions reductions from your energy efficiency project. The more your project cuts greenhouse gasses, the more incentives you will earn!

SoCalREN uses normalized metered energy consumption (NMEC) to measure energy savings at the meter, unlocking project opportunities that aren't eligible for traditional incentive programs.

*A project must save at least 10% of the facility's annual energy usage.

Your SoCalREN Project Manager will support you every step of the way!
