

Get SoCalREN cash incentives for LED lighting and control upgrades at your facilities

Incentives for lighting have never been better. Contact your SoCalREN project manager to reserve your LED lighting incentives.

Incentives are available on a first come, first serve basis. Facilities in underserved communities get double the incentives!

Most lighting
projects see a
10-20%
reduction in
energy usage!

Switching from fluorescent lights to LEDs has multiple benefits:

- Lower monthly bills
- Longer lasting lights and less maintenance
- Better quality light (you can customize the color too!)

Get additional savings and life out of your lights by adding dimmers and upgrading lighting controls. Upgraded control systems that use occupancy sensors and automatic lighting controls reduce the time it takes to manage energy efficiency in your buildings.

SoCalREN supports your agency through **project identification, incentive application, and procurement.** We will review your current lighting inventory for opportunities or help you conduct a site visit to confirm your inventory list is accurate.

Contact your SoCalREN project manager for more information about our LED lighting and controls incentives.

The SoCalREN Public Agency Programs are administered by the County of Los Angeles and funded by California utility ratepayers under the auspices of the California Public Utilities Commission.

Frequently Asked Questions (FAQs)

I want to participate but I don't have funding for this project. Does SoCalREN provide funding and financing opportunities?

Yes! Your SoCalREN project manager can help you identify multiple funding and financing opportunities including SoCalREN's Revolving Savings Fund, SCE's on-bill financing, and grants that fit your project type. Visit <https://socalren.org/financing> or talk with your SoCalREN project manager today!

Do I have to upgrade all lights at a site to qualify for incentives?

To maximize your incentive, we recommend upgrading as many lights as possible. This will ensure you see a significant reduction in your facility's energy consumption. Your SoCalREN project manager can walk you through the project's economics to ensure it meets your financial criteria. If not all lights can be upgraded at once, SoCalREN will still review the project scope to identify the best incentive pathway for your project.

How can SoCalREN expedite our procurement process to get this project done?

SoCalREN has procurement experts who can guide you through all available procurement methods for your project. SoCalREN can often identify an expedited procurement method that bypasses a formal bidding process. Speak with your SoCalREN project manager today to identify the best option for you.

When is the best time to start these projects and complete installation?

SoCalREN works with your project timeline and your fiscal year! School districts commonly complete projects during their spring or summer break, when students are not on campus. We will work with you to identify the ideal timeline for your project.

Contact your SoCalREN project manager for more information about our LED lighting and controls incentives.
