

Pipe Insulation, Boiler Upgrades & Smarter Heating

Boost efficiency, strengthen resilience, and save big!

Stop the waste—start the savings.

From hot water and steam boiler replacements, pipe insulation, to generator upgrades, SoCalREN cash incentives are here to help you cut energy costs and modernize your facility.

BOILER REPLACEMENTS

Key benefits of replacing your boiler

- ✓ Cuts energy usage by 10-15%, reducing facility utility bills
- ✓ Improves reliability and reduces downtime
- ✓ Minimizes required maintenance and increases equipment life
- ✓ Eligible for cash incentives* to offset capital costs

*Average savings are estimated at \$32K for 4,000 kBTU/hr 1st Tier and \$80K for 4,000 kBTU/hr 2nd Tier, based on past projects.

Hot water boiler operational efficiency**	Percent of cost covered by SoCalREN cash incentives
89% combustion efficiency or 87% thermal efficiency	~16%
94% combustion efficiency or 92% thermal efficiency	~42%

**For process hot water applications [digester heating, clean-in-place (CIP)/sanitation, and process heating]. Boilers operating below 89% combustion efficiency or 87% thermal efficiency are not eligible for incentives.

PIPE & FITTING INSULATION

Insulate indoor and outdoor hot water pipes and fittings while SoCalREN cash incentives last!

Insulated hot water pipes and fittings deliver hot water faster, cut energy use, reduce water waste, and can lower your utility bills.***

***Pipes must be at least 1/2-inch in diameter and currently bare or uninsulated to qualify. Replacement of damaged existing insulation is not eligible. Cost-effectiveness review applies — contact us for pre-screening on small projects.

Pipe / Fitting	Cash incentive rate
Outdoor	\$64 per fitting or \$64 per linear foot
Indoor	\$25 per fitting or \$25 per linear foot

GENERATOR UPGRADES

Upgrade diesel-fueled generator engines with dependable, modernized tech

Use diesel-fueled emergency or standby generators? SoCalREN now offers incentives to replace your generator's thermosiphon engine pre-heater with a more efficient circulating block heater, boosting efficiency and reliability. 2026 per-unit cash incentives include:

Generator size	Per-unit cash incentives, properly sized	Per-unit cash incentives, undersized
Small generators (37-199 kW)	\$750	\$470
Large generators (200-799 kW)	\$400	\$370

Act now while incentives last—schedule a site visit with your SoCalREN Project Manager or email info@socalren.org to identify your eligibility for your next incentive-powered upgrade!

The SoCalREN Public Agency Programs are administered by the County of Los Angeles and funded by California utility ratepayers under the auspices of the California Public Utilities Commission
