

Natural Gas Efficiency Incentives

SoCalREN now offers targeted incentives to help offset the cost of efficiency upgrades, so you can act sooner and save faster. Choose the upgrades that fit your facility:

Your facility's next

EFFICIENCY UPGRADE can:

- Reduce natural gas usage and greenhouse gas emissions
- Lower energy costs
- Enhanced ventilation
- Improve facility efficiency, sustainability and resilience

Eligibility

- Your facility must be serviced by SoCalGas.
- Measure specific eligibility criteria apply, and incentive coverage varies by project.

Water Heating & Efficiency

- Tankless water heater
- Storage water heater
- Faucet aerator
- Gas dryer modulating valve
- Boiler replacement
- Hot water pipe insulation
- Laminar flow restrictor
- Demand control recirculation pump
- DHW loop temperature controller
- Recirculation pump timer

Water Infrastructure

- Hot water pipe and fitting insulation (outdoor & indoor)
- Hot water tank insulation
- Process hot water boiler replacement

Process

- Steam trap replacement
- Steam boiler economizer

HVAC

- Demand control ventilation
- Supply fan controls
- Enhanced ventilation
- Switch reluctance motor
- Patio heater

Recreation

- Pool cover
- Pool/spa heater

Food Service

- Conveyor oven
- Rack oven
- Automatic conveyor broiler
- Underfired broiler
- Rotisserie

Appliance

- Ozone laundry
- Gas dryer modulating valve
