

## Dear Parents/Guardians,

Thank you for supporting Kits for Kids by installing the energy-saving materials from your child's kit. Your efforts help protect the planet—and could win your child's class a \$1,000\* grant!

Here's what to do:

### 1. Have the Kit Ready

Your child received an energy efficiency kit at school, along with an installation verification card. Keep the kit nearby when you start the activity.

### 2. Play Fuzzy's Scavenger Hunt Game Online

- Visit [socalren.org/energymonsters](https://socalren.org/energymonsters) to get started.
- Go through each item in the kit with your child during the game.
- As the game introduces each material, install it together in your home.
- Installation videos are also available on our family portal.
- If you already have some items installed, keep these as replacements for later.

### 3. Fill Out the Installation Verification Card

- Write down which materials you installed.
- Answer the remaining questions on the card.

### 4. Return the Installation Verification Card to the Teacher

- Your child must bring the completed card back to school.

### 5. Help the Class Earn \$1,000\*

If at least **65%** of students return their installation verification card, the class earns the **\$1,000 grant**.

### Questions?

If you have any questions, please email us at [kitsforkids@socalren.org](mailto:kitsforkids@socalren.org) or call (877) 785-2237.

### Additional Resources

Visit our Family Portal at [socalren.com/kits-for-kids/families](https://socalren.com/kits-for-kids/families) for:

- Installation videos
- Other energy efficiency programs
- Student resources

And don't forget to follow us @SoCalREN on Facebook, Instagram, and LinkedIn to stay connected.

\*A \$500 grant will be offered to classrooms of 10 students or less. Grant eligibility is dependent on availability of funds. No personal identifying information is collected.
