

Dear Teachers,

Thank you for participating in the Kits for Kids program! We've designed this process to fit smoothly into your existing instruction and make it easy for your class to earn the \$1,000* grant.

Here's how to participate:

1. Prepare Your Lesson

- Review the [Lesson Plan](#) and [Presentation](#).
- You may adapt the lesson to suit your students' needs, but please keep the energy efficiency portion—Fuzzy's Mission Scavenger Hunt—so students learn about the kit.

2. Distribute Kits

- On the same day you deliver the lesson, hand out the kits to students.
- Remind them to return their completed installation verification card to you.
- Choose the method that works best for you to help students keep track of their cards and make sure they return them.

3. Submit for the Grant

- Once you've collected all the installation verification cards, you'll receive an email with instructions for submitting your class information.
- If the 65% threshold is met, we'll confirm via email of your grant status.

4. Share Your Feedback

- After the program, you'll receive an email with a survey link to share your feedback. Your input helps us improve the experience for teachers, students, and families.

Questions?

If you have any questions, please email us at kitsforkids@socalren.org or call (877) 785-2237.

Additional Resources

Visit our [Family Portal](#) for:

- Installation videos
