

## Cut Costs and Increase Productivity With Energy-Saving Upgrades

Southern California Regional Energy Network (SoCalREN) offers valuable incentives and guidance to help small and medium-sized farms upgrade to energy-efficient pumping, lighting, and ventilation.

### Here's What You Can Get

- On-site energy assessments
- Expert guidance on upgrades
- Incentives and no-interest financing
- Project support from start to finish
- Lower energy and maintenance costs

### Available Upgrades

- Process boiler
- Heat curtain
- IR film
- Agriculture ventilation fans
- VFD on agriculture well pumps
- VFD on agriculture booster pumps
- And more!

### Get Upgrades at **No Cost**

SoCalREN supports a wide range of customers, especially those in underserved or rural communities. Some farms are eligible to get energy-efficient equipment installed at **no cost**.
