Two Kendrick Elementary School teachers purchased a 3D printer for students to incentivize, design, create, and explore mathematical concepts by bringing them to life.

Kern County Teachers Bring Energy Education and Grants to Their Classrooms

Greenfield Union School District Teachers Earn $16,000 in Grants

For Greenfield Union School District (USD) teachers, enrolling in the Kits for Kids Program offered a meaningful way to extend the energy concepts students were already learning in class. The Program combines hands-on activities, standards-aligned lessons, and family engagement opportunities that spark curiosity and energy-saving actions students can engage in at home.

In class, Greenfield USD teachers introduced students to the benefits of energy efficiency with fun activities and online games. Then, students took home free energy-saving items to help lower everyday costs.

Resulting Impacts

- Teachers used grants to purchase 3D printers, touch-screen mobile monitors, robots, circuit kits, and other STEM learning tools.
- Greenfield USD Curriculum Specialist Norman Graham IV introduced the Program to Wayne Van Horn Elementary, expanding Kits for Kids to the Panama-Buena Vista USD.

"The Kits for Kids Program gave meaningful hands-on opportunities in the classroom, while encouraging students and their families to make considerable changes to save energy in their homes."

– 4th Grade Teacher, W. A. Kendrick Elementary School

Bring Kits for Kids to Your School

Enroll in SoCalREN's Kits for Kids Program today.

Email **kitsforkids@socalren.org** or scan the QR code to submit an interest form to get started.

*If at least 65% of students return their installation verification cards, the class earns a $1,000 grant. A $500 grant is offered to classrooms with 10 students or fewer. Grant eligibility is dependent on availability of funds. No personal identifying information is collected.

The Southern California Regional Energy Network is administered by the County of Los Angeles and funded by California utility ratepayers under the auspices of the California Public Utilities Commission.
