SoCalREN | Kits for Kids

Bring Energy-Saving Fun to Your School

The SoCalREN Kits for Kids Program helps third- and fourth-grade students learn about energy efficiency while bringing home no-cost energy-saving items. Plus, classrooms that participate have the chance to earn a **$1,000 grant**.*

How It Works

1 Teachers and districts can enroll at **kitsforkids@socalren.org** or with the interest form at **socalren.org/kitsforkids**.

2 Teachers share lesson plan.

3 Students get kits and install energy-efficient items at home.

4 Students return verification cards to school.

At least 65% of students must verify installation.

5 Classrooms receive a **$1,000** grant.

Classrooms with 10 students or fewer receive a $500 grant.

6 Families enjoy energy savings.

What's Included

Energy Efficiency Kit

- Smart LED wi-fi bulb
- LED night light
- 5-minute shower timer
- LED digital thermometer
- Solar hand-crank flashlight

Lesson Plan

- PowerPoint presentation
- Energy efficiency activity
- Fuzzy's Resilient Energy Game

Who's Eligible

- Schools in SoCalREN territory†
- Third- and fourth-grade students
- Households in SoCalREN's service area
