SoCalREN

Bring cost savings and energy-efficient resources to your schools with SoCalREN

FOR FACILITY MANAGERS

Small Hard-to-Reach Direct Install Multifamily Program

Upgrade your energy-consuming equipment at **no cost** and experience lower energy bills. Work with SoCalREN to identify eligible equipment upgrades and seamlessly coordinate installations, free of charge. Only available to agencies in rural, hard-to-reach, and underserved areas.

Interested? Contact smallhardtoreach@socalren.org

Types of Upgrades Available

- Pipe insulation
- Faucet aerators
- Heat pump water heaters
- Ventilation drive and fan controls
- Natural gas tankless water heaters
- Boilers
- Gas dryer modulating valves

Commercial Strategic Energy Management

Learn how to deliver long-term, sustained energy savings at your facilities through real-time energy tracking tools and reinvest those savings into classrooms. Participating campuses receive energy coaching, peer-to-peer learning, and up to **$10,000 in milestone incentives** for participating in program activities.

FOR CLASSROOMS

Kits for Kids Program

Introduce third- and fourth-grade students to energy efficiency with activities about climate resiliency, an interactive scavenger hunt and a take-home kit. Each enrolled classroom **receives $1,000** if 65% of students install energy-efficient items at home from the take-home kit.

Get started at socalren.org/kitsforkids

Benefits

- Students receive kits that include: Smart LED WiFi bulb, LED night light, 5-minute shower timer, LED digital thermometer, solar hand-crank flashlight
- Students, teachers, and families experience an accessible introduction to energy efficiency.
- Families enjoy long-term savings on their energy costs.

SoCalREN Eligibility

Must be a public agency served by SoCalGas or SoCal Edison within SoCalREN's service territory (socalren.org/about). Additional eligibility requirements may apply for certain programs.

The Southern California Regional Energy Network is administered by the County of Los Angeles and funded by California utility ratepayers under the auspices of the California Public Utilities Commission.

REAL SCHOOLS, REAL SAVINGS

Towne Avenue Elementary School

Two Classrooms Received $1,000 Each After Completing SoCalREN Kits for Kids Program

Led by teachers Dan Bonn and Paul Zinza, students from two classrooms recently completed SoCalREN's Kits for Kids Program. Bonn and Zinza said the energy-saving information seamlessly fit into lessons about health, Earth Day, and current weather and events. Because the families of 65% of the students in each class installed the energy-saving items they received, each classroom earned a $1,000 grant. The teachers plan to use the funding to purchase a 3-D printer and a set of books for the classes to use.

"By participating in this program, the students are leaving a legacy for future classes and earning money for the school."

– Paul Zinza, Educator

Santa Barbara Unified School District

Achieved Over $184,000+ in Lifetime Cost Savings Thanks to Upgrades Completed with SoCalREN

The school district successfully upgraded 13 water heaters to provide seamless water heating for several of its facilities, including the cafeteria, admin office, pool showers, maintenance room, health center, and classrooms. With support from SoCalREN, including cash incentives and no-cost technical assistance, the District cut natural gas use by 15-20%.
