SB 1414 permitting requirements. This new law will require that for central AC and heat pump projects, the customer or contractor must also provide proof that the permit was closed by the local building authority. Equipment that is covered under this legislation is: central air conditioning (split and packaged units), heat pumps (air source, ground source, etc., split and packaged units), and fans associated with central air conditioning units or heat pumps.

- The work completed on this project does not trigger permit closure requirements as defined by SB 1414.
- The work completed on this project triggers permitting requirements as defined by SB 1414, and proof of permit closure for the applicable scope of work is included in this submittal for the improvement incentive. A photo or scan of the final permit signed off or a certificate of Final Completion and Occupancy is provided, depending on the scope of work.

Agreement

I agree that the above information is true and correct, and all permits were pulled associated with the scope of work submitted under the SoCalREN Multifamily Program and as required by the jurisdiction having Authority.
